EXAMINER'S AMENDMENT

1. Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification:

The first paragraph of the specification has been amended as follows:

- -- [0001] This application is a divisional of United States Patent Application No. 09/879,363 filed on June 12, 2001, now United States Patent No. 6,708,687. The disclosure of the above application is incorporated herein by reference. --
- 2. The following is an examiner's statement of reasons for allowance: Applicant has amended claim 11 to specifically recite that the compressive stress imparted upon the mirror during the cooling of the facet is a result of the facet being heated to a higher temperature then the temperature of the mirror. It is well known in the art to impart compressive stress upon the mirror during the cooling process. However, this has always been accomplished by using a facet that has a different coefficient of thermal expansion than that of the mirror. It is also well known to use similar coefficients of thermal expansion, but applicant is the first to use a method that allows impartation of compression stress during cooling while maintaining similar coefficients of thermal expansion. Each of the independent claims, 11, 14, and 19, articulate that the compressive stress imparted is a result of the temperature difference and not a difference

Application/Control Number: 10/755,960 Page 3

Art Unit: 1733

between coefficients of thermal expansion. Examiner therefore deems the independent and dependent claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance." Claims will be renumbered as necessary.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Christopher T Schatz** whose telephone number is **571-272-1456**. The examiner can normally be reached on 8:00-5:30, Monday -Thursday, 8:00-4:30 Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Blaine Copenheaver can be reached on 571-272-1156. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
